ABOUT ME

A motivated and ambitious problem solver with a great passion for technology industry at the same time willing to grow professionally in the software development field, I would like to join a team of like-minded developers. Thorough and precise in everything and a keen interest in technology who also likes challenges, I am looking for a position in industry in which I can advance and put into practice my knowledge and skills by creating both logical and innovative solutions to further the mission of the company.

PROJECTS

[08/2022 – Current] **rTrust**

rTrust is a cutting-edge project focused on revolutionizing digital identification and document signing through the implementation of digital certificates. rTrust provides a secure and efficient method for issuing digital certificates, enhancing the authentication process for individuals and entities. These certificates serve as a digital representation of identity, bolstering the reliability of online interactions. The project extends its functionality to enable secure document signing. By utilizing digital certificates, users can electronically sign documents with the assurance of authenticity and integrity.
